PROFESSIONAL SUMMARY

Strategic and results-driven Data & Business Analytics professional with **4+ years of experience** translating complex datasets into **actionable business insights** across operations, finance, and strategy. Proven track record of **driving automation, building scalable reporting frameworks, and influencing leadership decisions** through advanced analytics and generative AI. Adept at working in **ambiguous, fast-paced environments**, partnering cross-functionally to define problems, design solutions, and deliver measurable business impact. Committed to continuous upskilling in the latest industry tools and methodologies (Google Data Analytics Certified).

CORE SKILLS

Analytics & Data
SQL (Advanced), Python (Pandas, NumPy, matplotlib), Advanced Excel & Google Sheets, Power BI (DAX, Power Query), Looker / Looker Studio, SAP Analytics Cloud, Big Query (GCP), ETL & Data Pipelines, R Basics

Automation & Engineering
Google Apps Script (JavaScript), VBA Macros, Workflow Automation, Data Validation & Quality Frameworks, Generative AI, Prompt Engineering

Business & Strategy
KPI & OKR Design, Operational & Financial Analytics, Stakeholder Management, Cross-Functional Collaboration, Process Optimization, Executive Reporting & Storytelling

PROFESSIONAL EXPERIENCE

Senior Data Reporting Analyst

Google Operations Center | Hyderabad, India
Oct 2024 - Present

- **Acted** as a strategic thought partner to senior leadership, designing and automating weekly, monthly, and quarterly KPI frameworks to monitor team utilization, optimization performance, and capacity metrics for the Banking client portfolio.
- **Built** and maintained scalable dashboards and reporting pipelines using SQL, Google Sheets, and Excel to track ad campaign optimizations and operational SLAs, enabling faster, data-backed decisions for high-value banking accounts.
- **Developed** productivity and performance dashboards to track optimization impact per case and operational efficiency, directly supporting campaign success and ROI improvements for banking advertisers.
- **Automated** complex reporting workflows for ads optimization processes using Google Apps Script, reducing manual effort by 40%+ and significantly improving the accuracy of client performance data.
- **Analyzed** multi-period trends across banking clients' ad accounts to identify operational risks and campaign optimization opportunities, contributing to a 20% uplift in process efficiency and client delivery.
- **Presented** concise, executive-ready insights on team performance and ads optimization trends to GOC leadership, driving alignment and informed decision-making across cross-functional teams.
- **Leveraged** Python scripting to automate data preprocessing tasks, specifically focusing on cleaning large volumes of ad performance and client data for faster downstream analysis.

Data Analyst - Associate Consultant

Argano | Hyderabad, India
Aug 2022 - Sep 2024

- Designed and delivered **end-to-end analytics solutions** for finance and operations teams, automating recurring reports and reducing manual reporting efforts by **35%**.
- Played a key role in a **large-scale data migration initiative**, moving SAP on-premise data to Snowflake via ETL pipelines, improving data accessibility and analytical scalability.
- Built interactive dashboards in **SAP Analytics Cloud** to monitor finance and operational KPIs, directly contributing to long-term client engagement and retention.
- Partnered with go-to-market teams to deliver **data-backed analytics and AI visualization demos**, supporting client acquisition and contract renewals.
- Collaborated cross-functionally with data engineering and business stakeholders to ensure data accuracy, consistency, and performance across reporting layers.

Data Strategy & Operations Intern

HighRadius Corporation | Hyderabad, India
Jun 2021 - Jul 2022

- Conducted in-depth market and customer segmentation analysis, identifying high-value client profiles and contributing to a **42% increase in marketing-qualified leads**.
- Built executive-level financial and sales dashboards using Looker Studio, simplifying complex datasets into clear strategic insights.
- Supported go-to-market strategy by identifying and qualifying decision-makers using LinkedIn Sales Navigator, streamlining the sales pipeline.
- Automated Salesforce CRM data workflows, improving forecasting accuracy and data integrity by **30%**.
- Developed a proof-of-concept real-time data integration pipeline (external financial APIs to Google Sheets), demonstrating advanced ETL and automation capabilities.

EDUCATION

Bachelor of Technology - Electronics & Telecommunication
KIIT University, Bhubaneswar | **2022**
CGPA: **8.55**
Higher Secondary (PCM with Computer Science)
DAV Model School, Durgapur | **2018**
Percentage: 85%

CERTIFICATIONS

- Google Data Analytics Certification – Coursera (Link)
- Advanced Data Analytics with Python (Link)
- Google Generative AI Essentials (Link)

PROJECTS

End-to-End UPI Transaction Analytics & Insights Platform (Link)

- **Problem Statement:** Designed a scalable analytics solution to simulate and analyze high-volume UPI transactions, addressing challenges in transaction monitoring, behavioral analysis, and financial insight generation across large user bases.
- **Tools & Technologies Used**: Utilized SQL for data modeling and querying, Python for data generation and analysis, and data visualization tools for trend analysis and performance reporting, with version control managed via Git.
- **Key Outcomes / Impact**: Enabled structured insights into transaction patterns, user behavior, and volume trends, demonstrating the ability to build enterprise-grade fintech analytics pipelines applicable to real-world banking and payments systems

Skills Used: SQL, Python (matplotlib, pandas), Excel, GitHub
